

YEAR OF MANUFACTURE

To determine the age of a generator set, locate the serial number then find the year under which the number fits in the charts below. Before 1936, blocks of numbers were reserved for the various models being built. Starting in 1936, however, serial numbers have been assigned in numerical sequence to all models as they are scheduled for production. The last serial number issued in the year is shown in the 1973-1936 chart. If a set has a serial number issued late in the year, it may not actually be completed until the following year. Because of this, the serial number determines the approximate year of manufacture only.

1973 - 1936

YEAR-LAST SERIAL#	YEAR-LAST SERIAL#	YEAR-LAST SERIAL#	YEAR-LAST SERIAL#	YEAR-LAST SERIAL#	YEAR-LAST SERIAL#
1977	1970 335653	1963 252100	1956 205516	1949 141392	1942 62237
